

# PRODUCT UPDATE

## Aspire Cove Chair – Fabric Update

Previously our Cove Chairs have had external surfaces upholstered with Warwick Tritan material. Whilst this is water resistant there was sufficient pushback from Hospitals and Aged Care facilities that these did not meet their infection control guidelines as they were not wipe clean.

All Cove Chairs will now come with healthcare vinyl on all external surfaces, with the inner patient surface remaining as pressure-reducing Dartex material, available in a Grey/Grey combination only.

In line with this change, we will also be rationalising our colour offering on the Cove Chair to offer a Grey/Grey combination only.
