Picklists for contracted Items

The State-Wide Equipment Program (SWEP) generates and maintains picklists for the use of SWEP registered Practitioners. SWEP recommends that you consider selecting contracted items.

Contracted Items ensure they meet the relevant Australian Standards, meet specifications required by our consumer group and are best value for money. You will only be required to get a quote from a supplier on items with modifications.

Some items are under the Aids & Equipment Program subsidy. Others may incur a co-payment by the consumer. The co-payment may vary depending on available subsidy and on accessories or modifications requested. You will be advised of full co-payment when application is processed.

If you choose a non-contracted item, you will be required to enter the relevant picklist code and submit a quotation with your application. You will need to ensure the quote has all required information.

Beds, Mattresses, Accessories

Beds

Supplier: GMS Rehabilitation

[Product Brochure Link](#)

The NEW Etude Plus bed is leading the way with comfort, ease of use and its advanced features. Designed to assist caregiver's workload with 4 function hi-low, headrest raise, knee break raise, Trendelenburg and reverse Trendelenburg. The backrest auto-regression mechanism swings up and back as the bed profiles at desired angle for comfort and reducing the propensity for the client to slide down the bed. This reduction in shear and friction forces that can assist in the prevention of skin damage and associated pressure ulcer formation.

Features include:

- Electric backrest and knee break
- 4 rotating lockable casters with toe brake
- Personal hand control (options – with or without lockable hand control)
- High quality electronics
- Powder coated frame with stylish wooden panel design
- Easy Maintenance and handling, portable and great for storage
- Tool free construction by one person
- Linak motor
- Hi 730mm and Low 330mm
- Overall dimensions 2190mm length x 900mm width
- Timber Beech Veneer Head and Foot Board
- SWL 180kgs

BED - FLOORLINE

Supplier: Cobalt Health

[Product Brochure Link](#)

The Floorline 7.5 Bed is a floorline bed with a low minimum height of just 7.5cm. Offering full 4-way electric adjustability, it is highly versatile and suitable for care either at home or at a facility level. Excellent height adjustment range, including the very low minimum height, makes it perfect for those who are at risk of injury from falls, without the need for inhibitive side rails.

It includes a number of advanced features, such as the Auto-Contour function which supports the user while adjusting the backrest angle to prevent them sliding down the bed. The Auto-Stop function stops the bed at 250mm when lowering to remind the user to ensure that the bed is clear from obstacles when lowering to prevent injury.

Supplier/Picklist Code	Description	Floor Clearance	Max Height, Min Height	Length	Width	Max User Weight
B18-FL	Floorline 7.5 Bed	7.5cm	Max height 190cm	Overall 2275mm; mattress platform 2000mm	Overall 1070; mattress platform 912mm	SWL 200KG; Max user weight 165KG

Pressure Mattress

PRESSURE MATTRESS

Supplier: ALTER

[Product Brochure Link](#)

The Softform Premier Active 2 retains properties as a high-risk Reactive support surface. However, should clinical judgement determine that the patient requires stepping up to an Active support surface, then a discrete pump can be fitted to the air insert transforming the mattress into a dynamic surface and delivering additional levels of pressure relief.

- Air Insert contained within standard Softform Premier mattress foam construction: Using the pump allows stepping up and down between Reactive and Active alternating systems with minimum patient disruption. The air cells alternate on a 10-minute cycle, promoting tissue recovery and pressure distribution.
- Air system placed beneath foam insert: Greatly reduces risk of sharps puncture.
- High risk static mattress, delivering exceptional pressure reduction and patient comfort:
- In the event of a power failure, the patient is still resting on a high risk pressure reducing surface, minimizing the potential of pressure damage occurring until power is restored.
- Mattress does not require turning. Reduces manual handling issues.
- Two- way stretch PU waterproof cover Provides excellent recovery and durability, and helps reduce shear and friction forces.
- High frequency welded seams and full length flap conceals the zip: Reduces the risk of fluid ingress.
- Toughened PU coated base: Prolongs the longevity of the mattress.
- Single piece of foam “U” core: Facilitates patient transfer by providing side wall support.
- Water penetration resistance: 35 kPa minimum (BS 3424: part 26). 35 kPa minimum after 20,000 cycles Martindale Abrasion Test EN ISO 5470-2.

PRESSURE MATTRESS

Supplier: Novis Healthcare

[Product Brochure Link](#)

The AreaCare Plus three-layer foam pressure surface offers maximum pressure reduction in a three-layer foam surface for higher risk patients. It has multi-density foam layers for maximum strength and comfort; protected by a cotton inner lining.

- Top cover has a four way stretch cover material for enhanced anti-shear and anti-frictions benefits.
- The cover is a vapour permeable, bacteriostatically treated, fire retardant and water resistant.
- The three layered, zoned design of this very high-risk pressure surface is ideal for patients with poor mobility or uncertain skin sensitivity.

PRESSURE MATTRESS OVERLAY

Supplier: Arjo Australia

[Product Brochure Link](#)

The Alpha Active® 3 pressure redistribution mattress overlay system offers a number of features designed to deliver effective pressure injury prevention and management for the home and community care environments. With two modes of operation, *Alpha Active 3* assists with prevention and treatment protocols, whilst accommodating clinical and resident/patient needs.

Active/alternating mode: periodically redistributing pressure away from vulnerable areas, by alternately inflating and deflating cells beneath the resident/patient. Ideal for prevention in high risk residents/patients, particularly those who cannot be frequently repositioned.

Reactive/static mode: cell pressure is equalised to redistribute the body weight over a greater surface area. Ideal for residents/patients in rehabilitation or that cannot tolerate a moving surface.

SWEP Picklist Code	Category	Description	Size (width x depth)	Max. User Weight
AA3/OLSYS	Pressure reduction overlay	Alpha Active 3 Mattress Overlay System	1950mm x 850mm x125mm	135kg

PRESSURE MATTRESS OVERLAY

Supplier: GMS Rehabilitation

[Product Brochure Link](#)

Alternating Overlay System is a high quality pressure relieving surface suitable for clients with medium risk of Ischemic Ulcer formation. The mattress overlay incorporates 17 cells, with the top 3 cells providing a non-alternating pillow section. The remaining 14 cells have a combination of ventilated and non-ventilated cells. The ventilated cells allow for low air loss circulation assisting in reducing perspiration and increasing client comfort. The PM265 Alternating Overlay System has been designed to assist with client safety, including a clearly indicated head and foot end, CPR release valves and alarms. Effective pressure relief is achieved by the alternation in a cycle of 9.6 minutes. Features of the pump unit include 10 comfort level adjustments, incremented in weight levels for a range of client's needs. Static mode with auto revert after 20 minutes, low pressure alarm indicated by an audible sound and visual LED indicator. Smart pressure detection technology starts and stops the pump as required. The lock out feature ensures peace of mind once unit is correctly set to individual needs. A power failure alarm and service alarm alert users or carers of the need for urgent action. Specifications: Overlay size 200cm (L) x 90cm (W) x 12.7cm (H) Safe working load of 160kg.

PRESSURE REPLACEMENT MATTRESS

Supplier: GMS Rehabilitation

[Product Brochure Link](#)

Full Mattress Replacement System is a high quality pressure relieving surface suitable for clients with medium to high risk of Ischemic Ulcer formation. The combination of specially designed cells incorporated with a low pressure high flow pumping system, enables maximum pressure reduction and pressure relief simultaneously. The full mattress replacement system incorporates 20 cells, with the top 3 cells providing a non-alternating pillow section. The remaining cells have a combination of ventilated and non-ventilated cells and have cell in cell technology, to provide additional protection for clients in case of power failure. The inner cells provide a nominal support when the pump is unable to supply air pressure due to prolonged times of power failure. Features of the pump unit include 10 comfort level adjustments, incremented in weight levels for a range of client needs. Static mode with auto revert after 20 minutes, low pressure alarm indicated by an audible sound and visual LED indicator. Smart pressure detection technology starts and stops the pump as required, therefore increasing the pump life expectancy, and reducing noise. Multi therapy modes assist carers and therapists in providing appropriate pressure care and improve client compliance. The lock out feature ensures peace of mind once the unit is correctly set to individual needs. A power failure alarm and service alarm alert users or carers of the need for urgent action. The ventilated cells allow for low air loss circulation assisting in reducing perspiration and increasing client comfort. The fully enclosed zippered cover is stretchable, vapour permeable, waterproof, and antimicrobial with welded seams consistent with Australian infection control guidelines. The Mattress size is 200cm (L) x 90cm (W) x 20cm (H) Inflated.

MOBILE SHOWER – TILT IN SPACE

Z300

Z303

Supplier: Motion Specialties

[Product Brochure Link](#)

The Raz-AT (Attendant Tilt) mobile shower commode chair tilts up to 40° to provide extra pressure reduction and comfort. The unique frame design utilizes locking gas springs that help lift the seat to an upright position, making the Raz-AT one of the easiest tilting mobile shower chairs to operate.

The Raz-AT mobile shower commode chair comes standard with the Ischial & Pelvic Alignment System (IPAS), 4" of height adjustment, adjustable-tension back upholstery, molded headrest and fixture, 5" dual-locking casters, flip-up padded armrests, and a commode pan.

The easy-to-clean, polished stainless steel frame fits over most toilets and is designed for easy side and front access by the user or attendant.

Supplier/Picklist Code	Description	Seat Width	Seat Depth	Seat Height	Product Weight	Max. User Weight

MOBILE SHOWER – TILT IN SPACE

Supplier: Novis Healthcare

[Product Brochure Link](#)

The Etac Swift Mobile Tilt has a unique adjustment bar for the tilt in space function. The bar makes it possible to tilt the chair standing behind, as well as, on the sides of the chair. Tilting from the side gives the best condition for an ergonomically correct work position and enables the carer to maintain communication and eye contact with the user. The gas pistons have a unique placement which facilitate bringing the seat to an upright position. This reduces the risk of injury to carers.

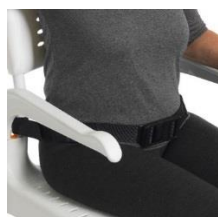

The height adjustment is easily done without tools and facilitates easier and safer transfers.

Supplier/Picklist Code	Description	Seat Width	Seat Depth	Seat Height	Product Weight	Max. User Weight
80209412	Etac Swift Mobile Tilt Shower Commode with Pan Holder	50cm	46.5cm	440mm	19.7kg	135kg

The Cobalt Health Air Chair is specifically designed for use in high care environments where patients can be at risk of pressure sores and other pressure management issues. The air cushion cell in the seat area, combined with the soft foam system throughout the chair, provides excellent pressure relief.

The Air Chair is highly adjustable, including arm rests and head wings that can be lowered below seat height for side transfers, as well as back rest tilt, leg rest tilt, tilt in space and adjustment for the height of the footrest pads.

Four large locking castors and rear push handles and controls mean that the Air Chair can be easily pushed, adjusted and locked in place by carers. The sturdy frame makes it extra durable, as does the high-quality four-way stretch upholstery and powder coating on the frame. The Air Chair is available in both Classic and Slimline sizes.

Supplier/ Picklist Code	Description	User Height	Seat to Floor	Seat Width	Seat Depth	Back Width	Backrest Height	Max. User Weight

[Product Brochure Link](#)

NOW WITH NEW INTELLIGENT MONITORING SYSTEM

The Invacare Jasmine Mobile Lift is a flexible solution that offers high comfort for all clients. The lift covers all needs. With its expansive, wide opening base and high lifting mechanism, Jasmine makes life easy for caregivers operating this new Invacare lift system. The control box with diagnostic system is an intelligent service monitoring system that enables a safe operating environment for the caregiver, whilst allowing maximum comfort for the client during each transfer.

Flexibility and Optimised Manoeuvrability

The Invacare Jasmine is exceptionally mobile and easy to move around. The wide-opening base allows easy access for a wheelchair or armchair, whilst the high lifting mechanism is essential for helping clients on and off high toilet chairs or examination couches. The Jasmine is flexible and with optimised manoeuvrability.

Safety First, with an Intelligent Control Box

Jasmine secures the patient's need for a safe and comfortable lift with control box with diagnostic system: an intelligent service monitoring system that highlights the battery status and service condition of the actuator to ensure safe patient handling. The control box provides a safe and comfortable lift for the client via 'soft start' and 'soft stop' button mechanisms.

Portable Ramp

RAMP

Supplier: ALTER

[Product Brochure Link](#)

EDGE BARRIER LIMITER (EBL) - Added security of edge barriers, particularly suited to providing instant access to buses, trains and buildings where a permanent ramp is impractical. 9 sizes available.

Benefits of Invacare Ramps:

- **PORTABLE** - Invacare Portable Ramps can be quickly folded into a single compact unit. This allows for easy storage or transport in any vehicle or home environment.
- **LIGHTWEIGHT** - Made from a unique combination of uni-directional glass and carbon fibre materials means Invacare Portable Ramps are very strong, yet light enough to be portable.
- **COMPACT** – Multi-panelled design held together with a patented hinge system connected by webbing. This enables Invacare Portable Ramps to fold with a concertina action, allowing for a much smaller width when folded
- **SAFE** - Clearly marked and grip tape covered, Invacare Portable Ramps are also fitted with pads at the top and base. This provides a non-slip surface for all weather conditions.
- **STRONG** – For security and peace of mind
- **SIMPLE** - Invacare Portable Ramps can be deployed in seconds, requiring no assembly and are ready for use immediately. Comes with 3 year warranty

Mobility Aids

Pressure Cushion

CUSHION - LOW TO MODERATE RISK, BASIC

ROHO® - Mosaic

Supplier: Aidacare Pty Ltd

[Product Brochure Link](#)

- Appropriate for everyday comfort and pressure injury prevention
- The Mosaic is excellent as a lounge-chair cushion and can also be used as a shower chair cushion
- Designed to provide a comfortable, functional and stable sitting environment for patients who are at risk of skin breakdown
- The Mosaic is also a Dry Floatation cushion but is made from softer plastic than the classic ROHO DF cushions. It is therefore lighter (0.5kg) but less rugged
- Interconnected air cells disperse pressure and promote stability as the pelvis sinks into them
- Maximum User Weight 113 kg

WIDTH (Size")	DEPTH (Size")

CUSHION - MODERATE TO HIGH RISK

ROHO® - Hybrid Elite

Supplier: Aidacare Pty Ltd

- Appropriate for clients with moderate to high risk of skin breakdown who require positioning support
- The Hybrid Elite combines the skin protection and shape matching ability of ROHO Dry Floatation with a contoured foam base
- The stability provided by the foam base assists “friction & shear” with safer transfers.
- The ROHO Dry Floatation system and 2-way stretch cover help reduce friction and shear whilst maximising blood flow
- The design allows for improved pelvic alignment and stability while maintaining optimal immersion and dispersion of pressure away from the pelvic area
- All models include 2 way stretch cover, hand pump & repair kit, operating instructions and 2 years warranty
- Maximum User Weight 225 kg

CUSHION - HIGH RISK, STANDARD

ROHO® Quadro Select

Supplier: Aidacare Pty Ltd

- Appropriate for clients at very high risk of ischaemic ulcers and for management and recovery from existing pressure injury conditions
- ROHO Dry Floatation promotes circulation, and pressure relief whilst flexible neoprene cells reduce shear friction
- Quick-and-easy air compartment adjustment maximises function and utility
- Quadro Select cushions employ ISOFLO Memory Control which locks air into compartments to help maintain better postural integrity in addition to pressure reduction
- All models include 2 way stretch cover, hand pump & repair kit, operating instructions and 3 years warranty
- Maximum User Weight Unlimited

[Product Brochure Link](#)

The Invacare Matrix Libra is next generation cushion - Superior comfort with the highest level of protection and positioning.

The Matrix Libra cushion combines an anatomically contoured, high resilient foam base with a dual layered fluid overlay using Flo-tech technology to provide optimal positioning and skin protection. Bringing together cutting edge design with innovative clinical features, this lightweight cushion has been designed with function, lifestyle, and protection in mind.

Matrix Libra: High-resilience foam cushion made with Ultra-Fresh anti-microbial and odour protection.

- Moisture-resistant, high stretch, breathable Startex outer cover or Nylon Cover
- Anatomically contoured foam base to optimize pelvic support and positioning
- Fluid sac requires no kneading or maintenance, non-temperature sensitive
- Highly flexible Platilon inner liner provides extra layer of moisture protection
- Waterfall front edge accommodates tight hamstrings and foot propulsion
- Maximum User Weight 136 kg
- Cushion height 2.3 – 3.5 inches

PRESSURE CUSHION – HIGH RISK,

Supplier: Eden Healthcare Solutions

[Product Brochure Link](#)

The Galaxy Cushion is designed to maintain skin integrity by providing a therapeutic, low pressure, low shear, low friction seating environment. The Galaxy combines multi-cellular air technology with a contouring design, shaped to fit the anatomical form. The pelvic support cells gently adduct the trochanters creating a hydrostatic environment around the sitting tissues. Coccyx relief cells are shaped to create a voided region in the rear of the cushion that keeps pressure away from this typically problematic area. Posterior sloped air cells help to prevent forward migration, and adductor cells gently push the user's femur to the midline of the cushion, creating balance and stability. The user's thighs are kept in medial-lateral placement through sculpted femur troughs. These features all work together to provide support for posture and positioning, along with the pressure care benefits of an air cushion.

- Maximum User Weight Unlimited
- Cells/profile contoured

PRESSURE CUSHION – HIGH RISK

Supplier: Independent Living Specialists

[Product Brochure Link](#)

Combines excellent pressure-reducing properties with the promotion of active correction and management of posture. The Invacare Matrx Flo-tech Solution Xtra Cushion and Modular System has been developed alongside clinicians to address complex seating needs. Through using this modular system, therapeutic interventions can be more effectively addressed with regards to postural maintenance by enhancing function, maximizing comfort and preserving skin integrity.

The first layer of fluid re-distributes pressure away from bony prominences so that the contact area between the person and the foam cushion is protected, The additional layer of fluid is incorporated under the ischial and sacral area to further enhance the pressure-reducing qualities of this cushion, making it suitable for those at a Very High Risk of developing pressure ulcers.

- Maximum User Weight 140 kg
- Cushion height 3 Inches

Supplier: Independent Living Specialists

[Product Brochure Link](#)

The JAY® Fusion™ is an adjustable wheelchair pressure cushion designed for skin protection that features JAY Flow™ Fluid or ROHO DRY FLOATATION® air insert options in a package that's comfortable, stable and supportive.

For convenience and protection, the Fusion wheelchair pressure cushion features a dual-cover system. The inner cover is water-resistant and easy to wipe off and clean, while its Aqua-guard zipper and anti-wicking thread protect the foam base from fluids. The machine-washable, stretch outer cover reduces surface tension and utilizes naturally anti-microbial, silver-impregnated X-static® fibre. A layer of 3DX spacer fabric dissipates heat and moisture for additional skin protection.

- Maximum User Weight 136 kg

PRESSURE CUSHION – HIGH RISK

Supplier: Independent Living Specialists

[Product Brochure Link](#)

The cellular design and the soft pliable material allow the individual to be immersed into the cushion for maximum pressure redistribution, while decreasing friction and shear. The simple adjustment allows the cushions to fit the shape of the individual, minimizing tissue deformation and maximizing blood flow.

- Maximum User Weight Unlimited
- Low profile cushion

SWEP consumer co-contribution may be required dependent on clients available pressure care subsidy balance

PRESSURE CUSHION – HIGH RISK

Supplier: Independent Living Specialists

[Product Brochure Link](#)

The Stabil-Air Cushion is our newest innovation. The Stabil-Air is the perfect blend of a multi-celled air cushion with contoured foam internal to each of the air cells. The internal foam provides two amazing benefits.

First, the internal foam is contoured, so that there is taller foam around the outside, with shorter foam for the leg troughs, the buttocks, and the coccyx. This contoured layer of foam provides a shell of stability and helps ease transfers on and off of the cushion.

- Maximum User Weight – Unlimited
- High profile cushion

The Standard Contour Cushion (4" cell height) is Star Cushion Products premier cushion for the prevention and treatment of pressure ulcers. Flexible, interconnected 4" air cells allow for deep immersion into the cushion providing constant low pressure across the contact seating surface. In addition, the cell moves and shapes to the contact area providing a low shear, low friction surface ideal for the prevention and healing of up to and including a Stage IV pressure ulcer.

PRESSURE CUSHION – MODERATE RISK

Supplier: Motion Specialties
[Product Brochure Link](#)

A Skin Protection cushion offering the Axiom Difference design elements with an emphasis on immersion and envelopment, Axiom S is a great entry level skin protection cushion.

With a special emphasis on the area that distributes pressure around the tissues that support the bony prominences. Deeper hexagonal shapes allow for increased immersion with better envelopment. The unique hexagonal foam shapes in the well reduce surface tension and increase envelopment around the ischia and coccyx. By only using one pleated cover, surface tension is reduced, providing better immersion into the well. Cooperating with Georgia Tech to study anthropometrics, Axiom S has a properly designed pre-contoured shape. The appropriately contoured cushion supports the trochanters and femurs while redistributing the load to protect the ischial tuberosities and coccyx. Axiom Ss innovative cover is aesthetically pleasing with functional benefits for both the client and caregiver. A water resistant zipper and loop zipper pull make it simple to don and doff the cover while protecting the foam. There is an easy-to-reach front handle with utility loops for hanging accessories. The base of Axiom S is constructed with high-IFD polyurethane foam. The cover is constructed with a 4-way stretch, water-resistant, pleated top layer with a skid-resistant bottom panel, and high denier side panels. All elements of the material lead to a long-lasting, comfortable and functional product.

PRESSURE CUSHION – MODERATE TO HIGH RISK

Supplier: Motion Specialties

[Product Brochure Link](#)

Axiom SPV Viscoelastic material is both viscous (changes shape slowly) and elastic (it returns to its original shape). It deforms and returns to shape very slowly. There is a significant lag between when you deform viscoelastic foam and when it returns to shape. Because energy is effectively absorbed and dissipated during the time lag there is less reaction force pushing back after deformation. Axiom SP Visco is designed to provide increased immersion, allowing the trochanters to bear an effective load. This improves stability by widening the base of support and reduces the load the tissue that supports the Ischial Tuberosities must bear. A thick section of specially designed Viscoelastic foam deforms to immerse and envelop the Ischial Tuberosities. Axiom SP Visco is constructed with foam that has a high IFD and density. The dual density polyurethane foam base offers firm support in the lower layer with a durable comfort layer on top. While the viscoelastic foam insert with unique hexagonal shapes increase envelopment and reduce compression around the ischia and coccyx. High-quality foam materials lead to a long-lasting, comfortable, and high-performing product. The viscoelastic foam insert with unique hexagonal shapes increase envelopment and reduce compression around the ischia and coccyx. The outer cover features a microclimatic spacer fabric layer with horseshoe design around the well for layer reduction allowing the foam insert to rest directly beneath the pleated 4-way stretch Lycra cover to reduce surface tension. Its important for all cushions to have a properly designed pre-contoured shape. Thats why we cooperated with Georgia Tech to study anthropometrics. Axiom SP Visco has a properly designed pre-contoured shape, designed to provide increased immersion, allowing the trochanters to bear an effective load, widening the base of support, and reducing the load the Ischial Tuberosities must bear. The well also has two small areas where foam is removed under the Ischial Tuberosities to facilitate immersion.

- Maximum User Weight 158kg
- Cushion height 3 Inches

PRESSURE CUSHION

Supplier: Motion Specialties

[Product Brochure Link](#)

Ki Mobility Axiom SPF The Axiom SP Fluid uses a Hydrolite fluid bladder instead of Viscoelastic Foam. The bladder rests directly under the super stretch outer cover, allowing it to conform to the tissues supporting the Ischial Tuberosities. Hydrolite is a non-Newtonian fluid that behaves as a solid under the force of gravity, but flows as a viscous fluid under load, which can help minimize shear. It is also incredibly light, eliminating the "weight penalty" of other fluid cushions. It is less temperature sensitive than other fluids, meaning it will provide more consistent performance regardless of climate. Axiom SP Fluid is designed to provide increased envelopment, allowing the trochanters to bear an effective load. This improves stability by widening the base of support and reduces the load the tissue that supports the Ischial Tuberosities must bear. Axiom SP Fluid is constructed with foam that has a high IFD and density. The dual density polyurethane foam base offers firm support in the lower layer with a durable comfort layer on top. High-quality materials lead to a long-lasting, comfortable, and high-performing product. The Hydrolite fluid bladder sits on top of the waterproof inner cover; reducing surface tension and maximizing envelopment of the ischia and coccyx. The bladder rests directly under the super stretch outer cover, allowing it to conform to the tissues supporting the Ischial Tuberosities. By using the super 4-way stretch Lycra outer cover material, surface tension is reduced, providing better immersion into the well. Its important for all cushions to have a properly designed pre-contoured shape. Thats why we cooperated with Georgia Tech to study anthropometrics. Axiom SP Fluid has a properly designed pre-contoured shape. Axiom SP Fluid is designed to provide increased immersion, allowing the trochanters to bear an effective load, widening the base of support, and reducing the load the Ischial Tuberosities must bear. The super 4-way stretch Lycra outer cover reduces surface tension while the pleated 4-way stretch inner cover with self-sealing zipper is water resistant and is easy to clean. The water-resistant zipper and loop zipper pull make it simple to don and doff the cover while protecting the foam. There is an easy-to-reach front handle with utility loops for hanging accessories.

PRESSURE CUSHION – MODERATE TO HIGH RISK

Supplier: Motion Specialties

[Product Brochure Link](#)

The Forward Cushion surrounds the pelvis with supportive contours while reducing pressure around at-risk bony prominences. This helps improve postural control without compromise of skin protection for users with mild to moderate postural challenges and some sensation. The cushion helps to keep the hips level and positioned at the back of the chair for enhanced stability. The Forward Cushion is most effective when coupled with a Ride® back support to aid in postural support.

- Maximum User Weight 113kg
- Cushion height 3 Inches

MANUAL WHEELCHAIR - TILT IN SPACE TRANSIT – ADULT

Supplier: Aidacare Pty Ltd

[Product Brochure Link](#)

- The REHAB RS is an ideal solution for the user who requires increased postural support and bodyweight redistribution. A reclined position is easily achieved, making the REHAB RS also a great option for those who fatigue easily.
- LOW TO MEDIUM LEVEL COMPLEX REHAB SOLUTION - Tilt-In-Space (TIS) functionality promotes increased support and improved positioning. This allows caregivers to position the user for optimal comfort. Adjustable, elevating legrests allow for precise leg positioning.
- ADVANCED COMFORT - Breathable PU coated multi-stretch fabric on seat and back cushions ensure optimal skin microclimate, comfort and improve pressure care outcomes.
- INCREASED SUPPORT - The easy-to-adjust, supportive headrest offers the user superior head support, while the gently contoured backrest facilitates posture and positioning.
- SUPPORTIVE & COMFORTABLE - Padded armrests, elevating legrests & a supportive headrest ensure that users of the REHAB RS are supported and comfortable.
- HIGHLY ADJUSTABLE- The wide array of adjustable features fulfil many clinical requirements and are geared towards comfort and support.
- EASY TO CLEAN - Wipe clean surfaces ensure infection control compliance.
